

TMR Mad Libs – Well-Child Visit

I took my brand new baby to the _____ (*adjective*) pediatrician's office for the second time.

The first "well-baby" visit didn't go very well at all. The _____ (*adjective*) nurse told me quite _____ (*adverb ending in -ly*) that she wanted to stick _____ (#*between 1-15*) vaccines into my child. "_____" (*same #*)! _____ (*exclamation*)", I balked.

I looked around the exam room and wondered what my Thinking Moms friends would say about this _____ (*adjective*) plan.

****Here's where things can change for the better. What if more parents realized they had more of a say in their child's health care? Back in the exam room:**

I looked around the exam room and wondered what my Thinking Mom friends would say about this _____ (*adjective*) plan. 'Is she _____ (*adjective*)? Babies don't _____ (*verb*) that many vaccines at once,' I thought.

So, I mustered the courage and said, "_____" (*interjection*) . My healthy baby is doing just fine without these _____ (*adjective*) shots. I've read _____ (# *between 1-60*) studies preparing for this appointment. I've also witnessed _____ (*vaccine-injured child's name*) first-hand vaccine injury.

I know how vaccines _____ (*verb*) people. Vaccine injury includes: _____ (*symptom of vax injury*), _____ (*another symptom of vax injury*) and _____ (*yet another symptoms of vax injury*). Vaccine injury is real.

Undeniably, it's affecting _____ (*large number*) of kids everywhere. And, it's avoidable if _____ (*medical person in the room*) would read more. Where did I learn so much? _____ (*name of group advocating vaccine safety*) and _____ (*name of website with vaccine safety info*). I also know that _____ (*between 1-48*) states offer vaccine exemptions. So, _____ (*opposite of yes*) thanks for the _____ (*adjective*) vaccines. My little _____ (*name of baby*) won't be getting any today.

Now, let's get this 'well-visit' started. Please check her _____ (*body part*), measure her _____ (*another body part*) and her _____ (*yet another body part*) circumference and we'll be on our way. If we _____ (*verb*) your help later, we'll be sure to _____ (*verb*) you."
